

CONFIDENTIAL – MVP PROJECT DOCUMENT

Longevity Health OS
A preventive health navigation platform.

Purpose: Build a lean but high-impact MVP that guides users on what health actions to take, when, and why.

1. Vision & Positioning

From data storage to health intelligence.

This product is not a medical record. It is a proactive health operating system focused on prevention, clarity and execution.

Core promise: Users always know their next health step.

2. Core Problem

Today, users:

- do not know which check-ups are relevant
- miss preventive actions
- have fragmented health data

Existing solutions store data but do not guide behavior.

3. Target Users

- Professionals 30–65
- Parents managing family health
- Health-conscious individuals

4. MVP Objective

- Immediate user value within 60 seconds
- Simple UX
- Lean architecture
- Ready for future expansion

5. Core Features

1. Personal Health Plan
Dynamic checklist based on age & gender.

2. Smart Reminder System

Context-aware reminders.

3. Vaccination Tracker
Manual entry + status guidance.

4. Family Mode
Multiple profiles in one account.

5. Dashboard
Clear prioritisation: Now / Soon / Later.

6. Smart Insights
Rule-based guidance (AI-like).

6. User Experience Flow

1. Onboarding (age, gender)
2. Immediate health plan generated
3. Dashboard shows priorities
4. User sets reminders
5. Ongoing engagement via notifications

7. Design Principles

- Simplicity over completeness
- Clarity over medical complexity
- Mobile-first
- High trust feel

8. Technical Scope

- Web App or cross-platform (React / Flutter)
- Simple backend
- Rule-based logic
- Modular structure

9. Out of Scope (MVP)

- No doctor integration
- No external APIs (mednet etc.)
- No real AI
- No complex analytics

10. Data & Privacy

- Minimal sensitive data
- Secure architecture
- Test data for development

11. Timeline Expectation

Target: 4–8 weeks MVP

Phases:

- Setup
- Core features
- Testing
- Launch

12. Success Criteria

- User understands next health steps instantly
- Engagement via reminders
- Clear perceived value

13. Future Roadmap (Not MVP)

- AI-driven recommendations
- Integration with providers
- Advanced analytics
- Insurance & ecosystem links

14. Expectations to Developer

- Lean mindset
- No overengineering
- Clear cost estimate
- Scalable base
